

Poverty

→ life's basic needs are not being met Poverty.

Ex - food.

clothes

shelter

Health

Education.

etc

According to Niti Aog.

- Poverty is the lack of fulfillment of minimum requirements for survival, health and efficiency.

for living → water + food

for health → Nutrition + Protein, vitamins

for strength → Housing, clothes, Education, Law and order
Health, Banking, Qualification

(National institution for transforming India)

Types of Poverty

- i) Absolute poverty
- ii) Relative poverty

According to the World Bank, a person is defined as extremely poor if he or she survives on less than \$3 a day as per (2021) data

Absolute Poverty — This is mainly used by developing countries

This method was used by R. Dagaad

↳ $FAO - MD - 2015$

↳ In 1945

Poverty Line — APL — minimum requirements
BPL

Relative Poverty — This is mainly used by developed countries
↳ This is used to measure Income Inequality
+ Relative Poverty

Lorenz curve

i) Lorenz curve

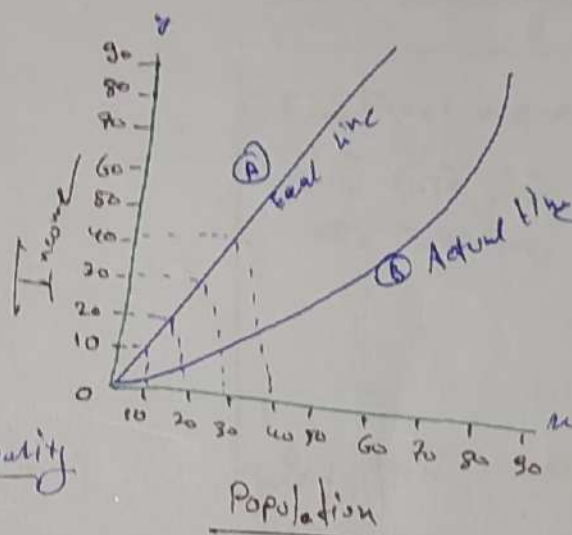

ii) Gini coefficient

• 1905 में लॉरेन्स और लॉरेन्स
of it method Cur

• He wants to say that equal income should be distributed in equal population

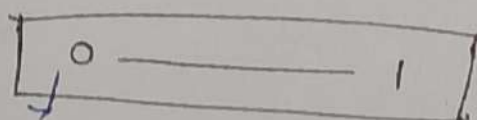

• But we see there is huge diff. b/w equal line and Actual line

This diff. is known Income Inequality

Gini Co-efficient

Lorenz curve of Numerical value of Gini coefficient

Complete Income equality

complete Income Inequality

HCR Head count ratio

• Poverty Line से नीचे लोगों की संख्या

% BPC formula

$$\frac{\text{BPL (जारी रेखा से नीचे)} \times 100}{\text{Total Population}}$$

Head count ratio = देश में कुल poverty

• Many Programs were run by govt. to remove poverty.

• Sarnajanti gram swarozgar yojana (SGSY)

• (National Urban Rozgar Yojana - NURY)

• The swarnajanti shree Rozgar yojana.

• P.M. Rozgar yojana.
