• Max age → Till death (fertility note - boys)

max age for girls → 45-50 yrs

↳ starts → (11-12) starting

• Insemination

• Sperm cell → OVA
(via genital path.)

• 200 - 300 million sperm cells

• Implantation

→ zygote

• single cell

• Gestation

Baby formation

↳ Womb.

↳ Nutrition

↳ Placenta

• Parturition

→ Delivery of baby

• cells which help to make sperm cells.

• Germ cells → Helps in making sperm

• Sertoli cells → Nutrition

• Leydig cell = Testosterone

Male Gland

• Paired Seminal Vesicle Gland

↳ Semen

↳ mucus

• Prostate Gland → (lactic acid)

↳ (sperm cell → speed)

2/ Cancer.

- Prostate cancer

(swelling)

In female → Breast cancer

Paired Bulbourethral gland.

↳ Sperm cell

↓

Fructose

↓

Energy

Semen.

Mucus + Citric acid + Sperm cell.

• Sperm cell way → Duct.

Rete testis → Seminiferous → Epididymis

↓

Vas deferens

• Vasectomy

Vas-deferens

↳ Sperm cell

• Tubectomy

↳ Fallopian tube

Male : main Reproductive Part

↳ Testis

↳ 4-5 cm (length)

↳ shape → oval

↳ width → (2-3 cm)

Pouch : → Scrotum

↓

35°C maximum sperm can survive.

Normal Temp. है Pouch की Temp. 2-3°C कम होता है

• Testis

• Accessory duct

• Male glands

• Genital Path (Penis)

Periods (menstrual cycle)

↳ 1st period → menarche
